Overview

The National Cyber Security Strategy was released by the Government of Canada on June 12, 2018. It replaced the first cyber security strategy issued in 2010 and implemented provisions in the 2018 federal budget related to enhanced cyber security efforts.

This event offers the first in-depth public discussion of Canada’s new cyber security strategy. Workshop panels will focus on the background to the strategy’s creation, its key features, and challenges to implementation.

An audience Q&A will follow the panel discussion.

When: September 27, 2018 (8:30 AM - 12:00 PM)
Where: 55 Laurier Avenue East, 12th floor room 12102

Space is limited
